

# Michigan's 2022-23 Benchmark Assessments 

Tara Kilbride, Ph.D.

Interim Associate Director, EPIC

[^0]
## BACKGROUND

The "Return to Learn" law outlined new student testing and data reporting requirements for school districts.

- Choose $1+$ math \& reading benchmark assessment from a list of approved providers or another test that meets the criteria outlined in the law
- Administer the assessment(s) to all K-8 students in the fall \& spring of each school year starting in 2020-21
- If using a state-approved assessment, provide aggregate data or allow EPIC to aggregate student-level data for use in a statewide report

The resulting dataset is complicated.

- The data came from multiple assessments and in multiple formats. The dataset begins in fall 2020, so there is no information about baseline achievement from before the pandemic.
- Our task is to interpret and translate the data into meaningful insights about student learning throughout the state during and after the COVID-19 pandemic.

## EPIC

## DATA \& METHODS

The full analytic sample is generally representative of MI's K-8 population, but some assessments and restricted samples are less representative.

| Sample Characteristics | Full K-8 <br> Population | MAP <br> Growth | i-Ready | Star <br> 360 | DRC | All <br> Vendors |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| \% economically disadvantaged | 55.8 | 55.9 | 58.2 | 50.9 | 49.0 | 55.6 |
| \% students of color | 37.1 | 36.2 | 53.6 | 25.5 | 13.1 | 38.7 |
| Months in-person in 2020-21 | 5.8 | 5.9 | 5.5 | 7.3 | 7.7 | 6.0 |
| Total number of students | 947,099 | 566,615 | 151,707 | 59,620 | 4,828 | 773,211 |
| Total number of districts | 852 | 634 | 74 | 78 | 23 | 755 |

| Sample | Students | Districts |
| :--- | :---: | :---: |
| Full sample (spring 2023) | 773,211 | 755 |
| School year growth (2022-23) | 725,399 | 750 |
| Longitudinal growth | 359,848 | 649 |

## EPIC

## DATA AND METHODS

Some of our analyses can only include certain samples/grade levels/assessments.

| Analysis | Sample | Grades | Assessments | Notes |
| :---: | :---: | :--- | :---: | :---: |
| Average Achievement <br> Trajectories | Longitudinal <br> growth | K-8 | MAP Growth, <br> i-Ready, Star | Grades 1-8 only <br> for Star Math |
| Variation in Student <br> Achievement | Full sample | K-8 | MAP Growth, <br> i-Ready, Star | Grades 1-8 only <br> for Star Math |
| Regression-Adjusted <br> Percentile Ranks | Longitudinal <br> growth | $3-8$ | MAP Growth <br> \& i-Ready | Some models <br> also include K-2 |
| Proficiency Rates | Full sample | $3-7$ | All | M-STEP grade <br> levels only |
| Student Growth | School year <br> growth | K-8 | All | All grades with <br> growth norms |

## EPIC

## Research Question 1:

How do Michigan students' achievement trajectories in recent years compare to pre-pandemic trends?

## NATIONAL NORMS

## Average achievement trajectories

As comparison points to help interpret MI students' scores, we use national norms for each grade level from before the pandemic

## EPIC

MAP Growth Reading

## MICHIGAN TRENDS

## Average achievement trajectories

In fall 2020, MI students in most grades were close to or slightly above national norms and fell [further] below norms by spring 2021

By spring 2023, K-3 students were generally near or above norms again; $5^{\text {th }}-8^{\text {th }}$ graders were still below norms

## EPIC

MAP Growth Reading

## NATIONAL NORMS

## Distribution of student achievement

MAP Growth Math

MAP Growth Reading

We use pre-pandemic percentile norms as comparison points to help interpret the extent of variation in MI students' achievement.

## MICHIGAN TRENDS

## Distribution of student achievement

MAP Growth Math

MAP Growth Reading

All MI students were impacted, but not to the same extent. There is more variation now than before the pandemic.

## REGRESSION-ADJUSTED PERCENTILE RANKS

After accounting for differences between grades, vendors, and districts, we find evidence of some recovery from initial math declines but little change in reading

## PROFICIENCY RATES

More students scored in the lowest proficiency categories in 2020-21 to 2022-23, compared to students in the same districts in 2018-19

Math (All Vendors)

M-STEP Math

Reading (All Vendors)

M-STEP ELA

## Research Question 2:

How has Michigan students' growth over the course of each year compared to typical yearly growth before COVID?

## EPIC

## GROWTH NORMS

## The "typical" amount of growth over the course of a school year depends on the grade level, subject area, and a student's initial achievement level

Students in lower grade levels tend to make more year-toyear growth than those in upper grades

Students with lower baseline scores make more growth over the course of a year than those with higher scores

Growth rates vary more in reading than in math

Example: "Typical Growth" on the i-Ready Diagnostic assessment

| Mathematics |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Fall Dlagnostic Placement Level | $\mathbf{K}$ | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | 6 | 7 | 8 |
| On Grade Level, Mid, Late, or Above | 21 | 21 | 18 | 21 | 19 | 14 | 13 | 11 | 9 |
| On Grade Level, Early | 24 | 26 | 22 | 25 | 23 | 18 | 13 | 12 | 9 |
| One Grade Level Below | 32 | 29 | 26 | 26 | 23 | 18 | 14 | 12 | 9 |
| Two Grade Levels Below | - | 36 | 29 | 27 | 23 | 18 | 14 | 13 | 10 |
| Three or More Grade Levels Below | - | - | - | 30 | 24 | 20 | 15 | 13 | 12 |

| Reading |  |  |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Fall Dlagnostic Placement Level | K | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | 6 | 7 | 8 |
| On Grade Level, Mid, Late, or Above | 43 | 37 | 22 | 17 | 12 | 7 | 4 | 4 | 4 |
| On Grade Level, Early | 44 | 47 | 29 | 22 | 17 | 13 | 9 | 6 | 4 |
| One Grade Level Below | 49 | 49 | 39 | 26 | 20 | 16 | 12 | 10 | 9 |
| Two Grade Levels Below | - | 54 | 44 | 33 | 23 | 20 | 14 | 12 | 12 |
| Three or More Grade Levels Below | - | - | - | 36 | 28 | 26 | 19 | 17 | 18 |

## EPIC

## MICHIGAN STUDENTS' GROWTH

## The share of students achieving "typical" (i.e., median) growth returned in pre-COVID levels by 2022-23, but some students still are not demonstrating any growth at all

Math (All Vendors)

Reading (All Vendors)

These improvements mean that, on average, students are not falling any further EPIC behind. It does not mean that they have "caught up." Students who start the school year behind would need more than a typical year's growth to catch up.

## MICHIGAN STUDENTS' GROWTH

Growth accelerated for $3^{\text {rd }} 8^{\text {th }}$ grade math $\& 3^{\text {rd }}-5$ th grade reading, stabilized for K-2 (both subjects) \& $6^{\text {th }}-8^{\text {th }}$ grade reading

Lower Elementary (K-2)

Reading (All Vendors)

Lower Elementary (K-2)

Upper Elementary (3-5)

## Research Question 3:

## How have trends in achievement and growth differed across subgroups of Michigan students?

## ECONOMIC STATUS

Regressionadjusted percentile ranks

Math achievement widened between fall 2020 and spring 2021, improved slightly by spring 2023

Reading gaps remained about the same across the 3 school years

## EPIC

## RACE/ ETHNICITY

Regressionadjusted percentile ranks

Math achievement widened between fall 2020 and spring 2021, improved slightly by spring 2023

Reading gaps remained about the same across the 3 school years

## EPIC

## ACCESS TO IN-PERSON INSTRUCTION (2020-21)

Regressionadjusted percentile ranks

Students whose districts offered inperson instruction all year in 2020-21 were the only group who didn't experience math declines that year

All districts had reading declines, but they were most acute in districts that were remote all year

## EPIC

## CONCLUSION

## Key takeaways

- On average, math achievement has improved slightly since spring 2021, but reading achievement has remained about the same
- Michigan students' achievement levels vary to a greater extent than would have been expected pre-pandemic
- Students in 2022-23 were more likely to reach targets for "typical growth" but many still did not demonstrate growth at all
- Groups of districts and students most negatively affected by the pandemic also experienced the most learning recovery, but some remain behind

## Implications

- It will take more time, resources, and support to recover academically
- Differentiated instruction \& individualized supports will be critical to meet students where they are
- These challenges are widespread both within and outside of Michigan
